

Reasons you may not be having complete success with MMS

We have people writing to us asking why they haven't had their "health restored" from a certain disease when they read testimonies from others that have the same disease with complete health restoration with testing done before and after finishing the sacraments. Are these testimonies real? How can we make statements like, MMS restores health from 95% or more of the world's diseases, when some with the same diseases that have had their "health restored" are still struggling with their ailments?

These are legitimate questions and we want to address them in this newsletter.

First of all, everyone is like a petri dish, if you will, with each one dealing with its own unique pathogens, circumstances and issues.

What does it mean to cure 95% of the world's diseases?

Well, no one knows exactly how many diseases there are on the earth. And more being found frequently. Are they all organic or biological, or inorganic such as, Morgellons disease?

We HAVE "restored health" to 95% of the known worlds diseases. That statement means that of the KNOWN diseases of this world we've seen health completely restored. But it DOES NOT mean that 90-95% of the people that have taken MMS have seen their health restored!

The problem is not that MMS doesn't kill 95% or more of the world's pathogens, but that the person taking the sacraments isn't doing something correctly, or there is another factor that is stopping their health from "being restored".

This is what I want to focus on in this newsletter. A lot of factors and variables have to be considered here.

Although, this is not an exhaustive list it is one that has come as a result of treating people around the globe

We have to consider the following:

1. Are the Sacraments being adhered to?

Probably the #1 reason why people aren't having complete success in "restoring their health". The MMS sacraments were developed by trial and error.

In the beginning Jim Humble, did not know exactly how long activated MMS or Chlorine Dioxide lasted in the body. We now know that it can last up to 1 hour in the body. We understand that although a few doses during the day can kill pathogens, it is much more effective in ridding the body of pathogens if the dosing is CONSISTENTLY being taken every hour for 8-10 hours a day. That CONTINUED

hourly bombardment of Activated MMS or Chlorine Dioxide in the body against the pathogens can increase the results tremendously! The person has to be consistent and dedicated to their hourly dosing. We know that it isn't convenient when working or traveling, but with the development of the 1000 sacrament in a daily bottle it is much easier. You can now prepare your whole day's dosing in a 1 liter or 1 quart bottle and carry it with you the whole day. So, now it is a lot easier and more practical.

Note: You have to remember to keep it out of the sun so not to neutralize its strength. A good idea is to set your phone's alarm to go off every hour as a reminder.

So, DO YOUR SACRAMENTS CONSISTENTLY IF YOU WANT GOOD RESULTS!!!!

2. Dosing

The basic MMS sacrament is 3 drops an hour for 8 hours. It is called Sacrament 1000 and can be taken with MMS1, (MMS activated), or CDS. Although this sacrament done for 3 weeks "restores health" to most health issues, many times we have to "ramp up" the doses to have better and quicker results. This is especially true with Herpes, Diabetes, HIV and 4th stage cancers. "Ramping up" is adding 1-2 drops an hour as soon as the body tolerates MMS well. By staying at the "standard" 3 drops an hour can take longer than 3 weeks, so the sacrament 1000 for 3 weeks might not "restore health". "Ramp up"!

3. Neutralization

Another reason why people aren't having success is they are neutralizing the doses. During the daily sacrament, you have to eliminate things that will neutralize or weaken the solution such as: Vitamin C, Coffee, alcohol, chocolate, anti-oxidants

- a. too many things at once
- b. recreational drugs

Note: If you are adding DMSO to your sacrament, i.e. Sacrament 1000+, you have to add the DMSO separately each hour by pouring out your hourly dose into a glass then add your DMSO, wait 3 minutes then drink.

Example: We had one guy come to us that had been taking MMS for 2 years without good results. I asked him what else he was ingesting during the day and he said, only 3,000 milligrams of Vitamin C! Well, no wonder he didn't have good results, he was neutralizing the doses.

Note: If you want to drink coffee or tea then do it for breakfast then wait an hour before you start your daily dosing. We have people taking Moringa 1-2 hours after the daily sacrament because it contains 47 antioxidants and by the time they start the next day's sacraments it is out of the body.

Important: Learn how to use the Chlorine Dioxide high range test strips and test all

liquids used to see if the chlorine dioxide is being weakened or completely eliminated. It is crucial to keep the chlorine dioxide working at its optimum potential consistently. It is best taken with distilled water, especially with the taste factor almost eliminated with CDS or the activation of MMS with 5% HCL, (hydrochloric acid). HCL is produced by the body and is used in the stomach.

4. Potency of doses (STRENGTH)

There are two things I want to mention here. First of all, is the MMS, CDS, DMSO, MMS2 the correct strength? If not, then you are not going to have the same results. The sacraments are based on a certain concentration of strength such as, MMS is 22.4% solution, MMS 2 is 65-75%, DMSO can be found anywhere from 70-99%, The sacraments using CDS were developed based on 3,000 ppm not 6,000, 12,000 etc.! We've had people come to us and test the potency of their MMS solution and it was 10-15% which is weak with some samples not even activating! So, make sure you get your products from people we recommend because we've tested them already.

We are NOT saying that all sellers are selling weak products, but we can only recommend those we know are producing their products correctly. So, be careful what you are buying because you want the correct potency. It is your health you are trying to restore and not theirs!

Note: Strong CDS such as 6,000 ppm and up can be explosive! It is not necessary to have CDS any stronger than 3,000 ppm, so don't buy it with a higher ppm. It will not "restore your health" any faster anyways! The hourly dosing once diluted is around 50 ppm. You can ingest it up to 100 ppm without discomfort, but when you go higher then it irritates the throat and mucus membranes.

And can be uncomfortable.

"If you start out with the wrong potency then you could end up with a different result or no result".

5. Time (how long to take the Sacraments)

The standard Sacrament dosing time frame is 3 weeks. After the 3 weeks, if your health isn't restored from whatever disease you are trying to eliminate from your body then just keep going until it is!

Especially with diseases such as Herpes, 4th stage cancers, debilitating diseases, diabetes, high blood pressure.

Note: If someone has had a disease for a long time, then it will usually take longer to eradicate it from the body.

Keep going til you are successful!

6. Different reception of host

EVERYONE responds differently for a variety of reasons such as:

- Parasitical infestations
- Liver problems
- Lung problems
- Toxicity of the body, i.e. the body is full of toxins and needs detoxing. When one is in this condition, you have to go VERY slow.
- Compromised immune system

Everybody has different issues they are dealing, so the reception of chlorine dioxide in the body differs.

Note: Don't think everyone responds the same and adjust accordingly, i.e. reduce dosing as needed or ramp up if possible. While one person may be able to “ramp up” to as high as 10 drops an hour others struggle with 5 drops an hour. So, adjust accordingly, but DON'T STOP!

7. Multiple complications or diseases

We've had people come to us for “health restoration” with breast cancer, leukemia, diabetes all at the same time. Now, when dealing with multiple diseases one has to religiously take the sacraments while “ramping up” and plan on doing the sacraments for longer than 3 weeks, more like months to completely restore one's health.

Remember: the longer one has a disease or multiple diseases the longer it takes to eradicate it from the body.

8. Previous Therapies

We have had people come to us, “on their last leg” and have had multiple chemotherapy treatments, radiation and surgeries which makes it hard to “restore health” due to weakened immune system, removed spleen and/or lymphatic system as well as the circulatory system cut and cauterized to hinder blood flow.

When a person is trying to “restore health” and has these situations to deal with he or she has to understand it might take much longer to detox the body from pathogens and “restore health”.

9. Diet

To build the immune system, one has to give the body the essential vitamins, minerals and nutrients. The body assimilates these essential best in their natural state. Organic foods, no GMO's, no hormones, no preservatives or processed foods.

We recommend to build the immune system foods such as:

- Raw milk
- Raw butter
- Raw cheese
- Fresh organic beef liver, chicken liver and red meat with the fat esp. red meat.
- Raw honey
- Moringa leaf (high in antioxidants) only to be used after daily sacraments.
- Fresh organic fruits and vegetables. Juicing raw is great!

Note: If one is doing the sacraments and follows an unhealthy diet then the results could be affected.

10. Parasitical infestations

We have started having people do a parasite cleanse and have seen better and faster results when the parasites are eliminated from the body. Everyone in this world has parasites they deal with in their lifetime but if the body's immune system is strong they are kept in check. But, when one's body is infested with parasites it has to be dealt with to “restore health” completely.

Note: Everyone should do a parasite cleanse once or twice a year to keep the body cleansed especially, those working in areas where they live and breed i.e. working with animals, sewage and other such areas.

11. Stress on immune system, (weak or non-existing).

Stress is a “killer” to the immune system of the body. Work, home, finances, relationships and just plain living in this world can cause a lot of stress if you let it. With a weakened immune system the body doesn't have its internal pathogen killing ability to help “restore health”.

Note: Try to live a stress-free life as much as possible while trying to overcome any health issues.

12. Attitude (You need a gratitude attitude)!

Having a positive attitude when trying to heal the body is essential. Be grateful for life itself and the pleasures it brings.

Note: Try to keep negative people and situations away from one's self when trying to “restore health”.

13. Blood testing (false positives and out right errors i.e completely

untrue)

Herpes

We have had people have a positive test for HPV and never have a breakout and have had people test negative and have had breakouts. Are these tests reliable? We spend more time asking people we are “restoring health” to, how do you feel? We want them to tell us the differences in their bodies if any and watch to see if they are gaining weight, sores healing, skin rashes and irritations gone and general sense of wellbeing, being restored. Those things are positive indications of health being restored even if the tests don't agree.

Note: Many times it is months before people get the results they want and maybe never, but “How do they feel?”

Autoimmune deficiency

The test for HIV is a test that looks for evidence of the presence of 47+ auto-immune deficiencies. It has been proven that many pregnant women test positive for HIV when in reality they are later testing as negative. People that have had tetanus shots have also tested positive for HIV when later testing negative. This has also been known to occur for people that have had a yellow fever vaccine.

Note: Watch out believing the HIV test!

14. Surgical destruction

It is difficult for the body to eliminate toxins from the body when the body's system that is in control of elimination such as these mentioned below are eliminated or damaged. Here are some key components of the body's immune system:

- Cutting out immune system (Lymph-nodes)
- Colon removed
- Kidneys removed
- Lung removed partially or completely
- Brain surgery (removal of brain matter and veins cut and cauterized)
- Spleen removed

Infections such as MRSA – Staph infections, are common results of surgeries worldwide and the present of this bacteria in the body hinders the restoration of health until it is eliminated.

15. Vaccines residue

Vaccines have been proven to cause many diseases such as Autism, paralysis, partial or complete, strokes, neurological disorders to name a few.

- Heavy metals – Mercury, aluminum and others
- Toxins – Formaldehyde, alcohol
- Diseases – The creator of the polio vaccine admitted that up to 50 diseases such as cancers and diabetes were added to the vaccine for polio.

Note: If someone has had multiple vaccines the restoration of health can be hindered.

16. Non-biological agents

High amounts of Asbestos in the body can hinder health restoration esp. in the lungs.

Morgellons disease is a disease that puzzles many because there is worm-like strains coming out through the skin and eyes and when examined under a microscope names of pharmaceutical companies are seen! This is not a natural occurring disease.

Note: There may be many more non-biological pathogens in the world that we have to consider when trying to “restore health”.

17. Family pressure

Family and friends can really discourage one from taking the sacraments correctly by being negative about what is being taken as well as doubting it will even work.

Husband not supporting wives and vice versa cannot discourage one from continuing and therefore not achieving restoration of health.

Note: The support from family and friends when trying to restore one's health is very important and the lack thereof can reduce the results of the sacraments.

18. Psychosomatic factors

Psychosomatic disorders are real to the person that has them but they don't really exist i.e. the person believes he or she has a diseases that really doesn't exist!

Psychosomatic illnesses exist and need to be considered when trying to “restore health”.

Note: if a person has been on the sacraments for a while with no results at all, then this has to be considered, especially if the person has psychological problems.

19. ENVIRONMENTAL TOXICITY (pollution)

We all know that our world is polluted to a certain extent evidenced by the pollution seen in the skies over the cities of world. We also have pollution in the following areas that we have to deal with on a daily basis.

- Work place - chemicals and toxins used in the work place
- Home chemicals – household chemicals and toxins used in the home
- Environmental – radiation, microwaves, radium etc.
- Chem trails – aluminum and barium sprayed throughout the world
- Water supplies – sewage, chemicals and toxins in the water we drink, Example: Fluoride

Note: If one is trying to “restore health” and is constantly in contact with high amounts of toxins, the body's immune system is occupied in trying to deal with eliminating these toxins and healing is more difficult and maybe the “cause” of the disease they are trying to eliminate!

20. Permanent damage (accidental, birth defects or surgical)

All the body organs and systems need to be in good condition if the body is to work at it's optimum capacity and if there is permanent damage to one or more of the body's functions then the restoration of health is hindered or not possible. i.e. if someone is paralyzed because of spinal cord damage then the ability to move certain parts of the body may never be restored. If the following parts of the body are permanent damaged then it could be possible to restore function but many times it is not.

- Brain damage
- Nervous system
- Circular system
- Appendix, Spleen
- Permanent damage through surgery
- Liver
- Heart
- Digestive system, (stomach, intestines and colon).

Note: We have seen those that have been told they had permanent damage and seen it reversed! One only knows by following the sacraments correctly, so try the sacraments to see if your condition can be reversed and “health restored”.

21. Organ toxicity

If the organs of the body are very toxic then these organs have to be cleansed slowly which will take more time in “restoring health”. The following organs have to be slowly detoxed to eliminate poisoning the body by not being able to eliminate the toxins quickly enough due to lack of function.

- Liver – (Sclerosis, liver cancer, hepatitis)
- Kidney -(On dialysis, kidney stones, infection)
- Gall bladder - (Gall stones, infection)
- Colon – (Clogged colon, cancer)
- Lungs - (Cigarette smoking is full of toxins and is counterproductive when trying to restore health to the lungs, but possible)

Note: Although these are conditions that may hinder chlorine dioxide's effectiveness, we have overcome these conditions while “restoring health” to individuals.

Remember every one responds differently, so do the sacraments correctly and don't stop! These are things to consider if you aren't seeing good results. It might just take longer.

22. Fungi

MMS is very good at “restoring health” with the presence of fungi, but there are a few that it can't eliminate. If the fungus is throughout the body and is located in an area where you have other issues, such as, diabetes related infections in the legs and feet then the restoring of health maybe be slower.

Note: A good way to test if there is the presence of a fungus that MMS can't defeat, you can apply activated MMS Spray on the area and if it burns (as if on fire) then the fungus may not respond to treatments.

Solution: Mix Aztec Clay, (bentonite clay), with Vaseline or olive oil and apply on the infected area and wrap it for the night as you sleep. If the fungus is on the feet then apply the mixture to the infected areas, wrap with a plastic cellophane and put sock over it then go` to bed for the night. This works real well!

23. Re- infected

You can have your “health restored” completely by using the sacraments and then be re-infected with the same disease. If a person has a sexually transmitted disease and his or her partner hasn't taken the sacraments or hasn't completely “restored health”, then the disease can be passed back to the partner again.

Just because a person has completely “restored health” it doesn't mean that they can't re-infect themselves again. If one continues the lifestyle or the exposure to a certain disease again after they have had their “health restored” then reinfection can very well occur.

Note: To eliminate re-infection of a certain disease, a lifestyle change has to take place to eliminate continued exposure.

Example: If one has contracted cancer and works with a lot of radiation constantly then they will have to be really diligent in eliminating exposure or just change jobs.

Example: If a person has multiple sexual partners then there has to be diligence in protecting one's self or only have one partner to eliminate the risk of re-infection as long as the partner is free of the disease. If not wait until the person's health is restored. Condoms don't necessarily protect from sexual diseases.

Make sure you clean the areas where contact was made with the other person with MMS1 or CDS. Carry a spray bottle of MMS1 or CDS with you to cleanse yourself.

24. Lack of finances to continue

Even though the sacraments we use are relatively inexpensive, there are some in this world that can't even afford that amount. If the product runs out then the sacrament is stopped and health is not restored even though one feels much better and has been alleviated from the symptoms, but not the health issue completely.

Note: If you start the sacraments make sure you can finish until health is restored.

Solution: Usually family and friends will help if you let them know you might need some assistance. Try to plan for this ahead of time before one runs out of product.

25. Self-deception

People can deceive themselves in thinking they are well when in fact they are still sick. Accept reality and take personal responsibility for your health and continue until all symptoms are gone no matter how long it takes.

Note: Even after one's health is restored, continue on the "maintenance doses" and maintain a good diet to keep the immune system strong.

Yes, again it might mean a lifestyle change!

26. Adjusting the doses

Even though it is mentioned above, it is important to mention just how to adjust the dosing. If a person is really sick then, you must go slowly, i.e. if a person has 4th stage cancer in the liver or lungs then we start with 1 drop an hour. If there is any adverse reaction then we reduce the dose to ½ drop an hour. This applies to all so-called terminal diseases. After reducing stay at that dose until one feels better to go up. Increase the doses SLOWLY! Don't stop!

If a person is adding the DMSO hourly, i.e. sacrament 1000+, and has a herxheimer reaction, then stop adding the DMSO for a day or so then try adding it again.

Note: Herxheimer Reaction or oxidative stress is when the body has so many toxins

being put into the blood that the body can't eliminate them fast enough so there is flu-like symptoms, (aches and pains in the joints and muscles, fatigue). When this happens reduce the dosing, maybe even start over.

Same when taking the Sacrament 2000 which is the addition of calcium Hypochlorite. If you add the MMS2, (Calcium Hypochlorite), and feel like you can't tolerate it then stop a few days then try again.

Note: We start the dosing of MMS2 with only a 1/16 of a "0" size capsule, 4 times a day during the sacrament every 2 hours, taken on the half hour. One can also try by starting 1-2 capsules a day.

If at any time the addition of DMSO or MMS2 or both becomes intolerable, then eliminate both of them and just do the Sacrament 1000 for a few days. When resuming the sacrament 1000+ or 2000 start slower.

Note: We have noticed that a person can do well with the sacrament 1000 and ramp up to 20 ml of CDS a day without a problem but when DMSO is added they "hit the wall" so to speak and can't continue. Eliminate the DMSO for a few days and reduce to 10 ml of CDS a day when trying to add the DMSO. Same is true for the addition of MMS2.

The thing to learn here is, ADJUST, your dosing according to how you feel. Too much reaction then "reduce". No reaction "ramp up". It is not bad to start over with the minimum doses you started with if necessary.

Note: Very few people have had to stop completely when they have learned to "adjust" their dosing according to how their body response. Learn your body's reaction, adjust as necessary.

We want a comfortable healing. You don't want to get sicker, so whatever is causing discomfort reduce it or eliminate it.

Remember: Everyone responds differently, so don't compare yourself to another person's experience you might have read about or talked to.

27. Trusting in the Medical and pharmaceutical system.

We have had coming to us people that are on meds because their doctor told them they would need them for the rest of their life. Example: Blood pressure, diabetes etc. We allow people to do whatever they want. It is their body and their responsibility. Some decide to discontinue their meds while others don't. Others choose to reduce the dependency slowly over time. It is up to each individual, but if they choose to continue taking their meds then the meds can be neutralized, (made ineffective), and the potency of the sacraments could be weakened.

Note: The human body came complete with its own disease fighting system and if working correctly then NO DRUGS are necessary to remain healthy.

28. High tension wires & Microwaves

It has been observed that people living near high tensions wires have had a higher rate of brain cancer and cancer in general. Living in an environment where there is a lot of high voltage or microwaves in the air could hinder health restoration.

Example: I read a few articles years ago about Americans working in the American embassy in Moscow during the cold war. There was a high rate of cancer among the embassy workers. Many thought the reason was because the Russians had high-powered microwaves pointed at the embassy constantly for surveillance or whatever their reason.

Note: If you are living in an area where there is direct exposure to high electricity or microwaves, you might consider relocating during the sacraments to see if this is hindering your health restoration. It might even be the cause of your illness or illnesses!

29. Dirty Water

Here is one that should be obvious to all. We all need a clean water supply. Pathogens and contaminants need to be eliminated from the water we drink daily. Chlorine and fluoride are used worldwide in water supplies and can have devastating results. Clean your water supply with MMS1 if you have a water reservoir or use a filter to purify the water you drink. Do both!

Note: For the sacraments we recommend distilled water or at least reverse osmosis and UV treated water. Distilled water is the best!

In conclusion, I have mentioned 29 reasons why MMS is not restoring your health, there might be more. If so, we will write about them as we become aware of them. Even though these reasons can affect the results of your health restoration, we have seen remarkable results worldwide when following the MMS Sacraments or Sacraments of the Genesis II Church of Health and Healing. Many times in spite of these reasons, complete "Health Restoration" has been accomplished!! And we are getting better at it all the time! I hope this information has helped.

30. The amount of stomach acid may neutralize weaker forms like CDS or CDH so change to the drops

Let's change the world together!

Archbishop Mark S. Grenon
